linkedin.com/in/jmrplens orcid.org/0000-0003-1250-6212

Embedded firmware and software engineer with experience building industrial firmware for solar inverters (C, STM32, FreeRTOS) and a solid R&D background in acoustics (physics). Focused on low-level optimization, industrial communications (Modbus) and hardware test automation. I maintain *open source* projects used by developers worldwide. Targeting **firmware, software and QA** roles, bringing engineering rigor and a focus on quality.

On-site, remote or hybrid

// EXPERIENCE

R&D Software Developer
Apr 2023 - May 2026

Power Electronics S.L. · Solar + Storage · Lliria, Spain

Firmware development for solar inverters and control systems in photovoltaic plants, working on STM32 microcontrollers with bare-metal and RTOS environments.

- Reduced RTOS task stack usage by 30% to 50%, optimizing memory on STM32 microcontrollers.
- Optimized Modbus TCP request handling, cutting CPU usage under load (40,000 req/s) from 80% to 17% with no dropped responses.
- Redesigned embedded file-system access, cutting access times by over 50%.
- Implemented a scheduled purge (daily/monthly) that safely clears thousands of files, preventing storage exhaustion under continuous operation.
- Built and maintained industrial communications in C with hardware abstraction layers (HAL): Modbus RTU/TCP, UART, I2C and SPI.
- Automated the test suite: ~50 to 80 unit tests per module (Ceedling, thousands in total) reaching 100% line and branch coverage via standard-library mocks/fakes, plus hundreds of on-hardware integration tests (pytest) for TCP/FTP performance and FTP security, all in CI.
- Reviewed merge requests across a 12-person team, catching bugs and proposing improvements before integration.

Predoctoral researcher
Jan 2023 - Apr 2023

Polytechnic University of Valencia + Spanish National Research Council + Hospital La Fe · Medical Imaging and Therapy Systems · Valencia, Spain

*Researcher in the R&D line: **Acoustic Metamaterials for Ultrasound Histotripsy treatments**.*

- Ultra-close focus acoustic lens design.
- Prototype manufacturing.
- Experimentation with ex-vivo tissues.

Predoctoral researcher
Jul 2021 - Jul 2022

Polytechnic University of Valencia + Spanish National Research Council · Medical Imaging and Therapy Systems · Valencia, Spain

The main objective is to conduct research and development of acoustic metamaterials for use in architectural applications and medical imaging.

- Developed acoustic metadiffusers reaching a diffusion coefficient of 0.8 with a thickness 10× smaller than traditional diffusers.
- Simulation of the acoustic diffusers and validation of results (MATLAB & COMSOL).
- Designed and 3D-printed (resin) slitted-tube waveguides with numerically-computed slits (2 to 3 cm tubes, ~0.5 mm slits) that increased ultrasound directivity and range ~15× in air, validated experimentally.
- Validated experimental results against those obtained in simulation.
- Advisor of the Master thesis of a student of the Master's Degree in Acoustic Engineering of the UPV.

TECHNICAL SKILLS

Embedded Firmware & Electronics
C
STM32 & ARM
ESP32 / ESP-IDF
PlatformIO
Texas Instruments
FreeRTOS / RTOS
Comm. Protocols
HW Debugging
Keil uVision
Instrumentation
Secure Boot & Embedded Security
Doxygen

Software Engineering & Tools
Python
C++
Go
TypeScript
Bash
Clang Tooling
Git
GitHub
GitLab
Docker
MATLAB
CMake
JetBrains Toolbox

Quality, CI/CD & DevSecOps
GitHub Actions
GitLab CI
Jenkins
SonarQube / SonarCloud
GoReleaser
Static Analysis & SAST
Testing
pre-commit hooks

Networking
TCP/IP & Networking
MikroTik RouterOS
WireGuard / VPN
IPv6 & Dual-stack
QUIC / HTTP3
DNS / Dynamic DNS

Security & Cryptography
Applied Cryptography
TLS / mTLS / PKI
Nginx Hardening
CrowdSec
Network Hardening

AI & Agentic Engineering
Model Context Protocol (MCP)
AI Coding Agents
LLM Integration

Simulation & Acoustics
COMSOL Multiphysics
LabView

Researcher in European project
Feb 2020 - Jul 2021

Higher Polytechnic School of Gandia + European Space Agency · Complex Media Acoustics Group of IGIC · Gandia, Spain

Implement and experimentally validate a sound mitigation method, applicable to a real space vehicle launch configuration (VEGA), that results in a significant decrease in sound pressure levels generated in the launch area during spacecraft liftoff.

- Designed the optimum acoustic-metamaterial geometry, achieving near-total absorption ($\alpha \approx 1$) across 200 to 500 Hz with a subwavelength design (wavelength/thickness ratio ≈ 16.5 vs ~2 conventional), validated on real lab prototypes.
- Simulation of a real environment to validate design performance (MATLAB, COMSOL & Python).
- Designed and 3D-printed the first prototype; for the large-scale version designed the injection-molding model and sourced the manufacturing of 600 modules with a supplier.
- Development of software for acoustic measurements according to ISO 10534-2 and ASTM E2611 standards. A|Lab
- Design and development of a 3-axis robotic system to perform experimental measurements. Photos and some information here: NEWS
- Results validated and accepted by ESA.

Research internship
Feb 2018 - Jul 2018

University of Alicante · Dep. of Physics, Systems Engineering and Signal Theory · Alicante, Spain

Internship in different research projects in the Applied Acoustics Group, belonging to the University Institute of Physics Applied to Sciences and Technologies of the Higher Polytechnic School of Alicante.

- Simulation of acoustic models.
- Acoustic measurements by means of a LabView-controlled robotic system.
- Investigation of the acoustic radiation efficiency (Vibration-borne noise) of metallic plates for an initial study of ship noise emissions in water. Carried out in collaboration with SAES, here you can read a news item on the subject: NEWS.

Founder and Vocal Member
Sep 2016 - Jul 2018

AmicroTech · University of Alicante · Alicante, Spain

Association based at the Higher Polytechnic School of the University of Alicante. Promotes project-oriented microcontroller programming knowledge.

- Taught 30+ students in reinforcement and extension classes for the subject "Digital Electronic Systems" of the Degree in Sound and Image Engineering of the University of Alicante.
- Laboratory organization and planning (located at the Colegio Mayor).
- Communication and Public Relations.

Sound technician
Jun 2011 - Feb 2018

Acusticox · Cox, Spain

- Equipment installation and adjustment for events.
- Equipment installation and adjustment for permanent installation.
- FOH Technician.
- Customer acquisition.

Laboratory technician
Sep 2005 - Nov 2009

Profdent · Alicante, Spain

- Reception of work and casting of plaster models from impressions (alginate/silicone), with and without implants.
- Mounting articulators and casting metal crowns in a centrifuge.
- Ceramic application on crowns and bridges.
